ELSEVIER

European Journal of Operational Research 118 (1999) 643–645

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

# Contents Volume 118

1 Putting soft OR methods to work: The case of the business improvement project at PowerGen
*R. Ormerod*

30 Environmental impact assessment and ranking the environmental projects in Jordan
*D. Al-Rashdan, B. Al-Kloub, A. Dean and T. Al-Shemmeri*

46 Radial DEA models without inputs or without outputs
*C.A.K. Lovell and J.T. Pastor*

52 Design of partially survivable networks for cellular telecommunication systems
*A. Dutta and P. Kubat*

65 Scheduling projects with variable-intensity activities: The case of dynamic earliness and tardiness costs
*K. Kogan and A. Shtub*

81 Application of the simulated annealing algorithm to the combinatorial optimisation problem with permutation property: An investigation of generation mechanism
*P. Tian, J. Ma and D.-M. Zhang*

95 Computing improved optimal solutions to max–min flexible constraint satisfaction problems
*D. Dubois and P. Fortemps*

127 The γ-connected assignment problem
*M. Poggi de Aragão and E. Uchoa*

139 An interactive procedure for multiple attribute group decision making with incomplete information: Range-based approach
*S.H. Kim, S.H. Choi and J.K. Kim*

153 Cost allocation in the Chinese postman problem
*H. Hamers, P. Borm, R. van de Leensel and S. Tijs*

164 Algorithms for a multi-level network optimization problem
*F.R.B. Cruz, J. MacGregor and G.R. Mateus*

181 Analysis of nonpreemptive priority queues with multiple servers and two priority classes
*E.P.C. Kao and S.D. Wilson*

194 Derivation of the *N*-step interdeparture time distribution in *GI/G/*1 queueing systems
*H. Luh*

213 Competitiveness analysis for strategy formulation
*M. Oral and A. Martel*

217 Competitive analysis of manufacturing plants: An application to the US processed food industry
*S. Jayanthi, B. Kocha and K.K. Sinha*

235 Measuring the performance of operations of Hong Kong's manufacturing industries
*C. Parkan and M.-L. Wu*
259 A methodology for competitive advantage analysis and strategy formulation: An example in a transitional economy
*Y. Li and S. Deng*
271 Linking industrial competitiveness and productivity at the firm level
*M. Oral, U. Cinar and H. Chabchoub*
278 Network companies and competitiveness: A framework for analysis
*S. Lakhal, A. Martel, M. Oral and B. Montreuil*
295 On the connections among activity-based costing, mathematical programming models for analyzing strategic decisions, and the resource-based view of the firm
*J.F. Shapiro*
315 Measuring the effects of new brand introduction on inter-brand strategic interaction
*P.K. Chintagunta*
332 Potential effects of managers' entrenchment and shareholdings on competitiveness
*Y. Gadhoum*
350 Tariff structure of Japanese electric power companies: An empirical analysis using DEA
*T. Sueyoshi*
375 A methodology for priority setting with application to software development process
*M. Lee, H. Pham and X. Zhang*
390 Job shop scheduling with beam search
*I. Sabuncuoglu and M. Bayiz*
413 An efficient algorithm for a generalized joint replenishment problem
*J.B.G. Frenk, M.J. Kleijn and R. Dekker*

429 Manufacturing flexibility: Measures and relationships
*R.P. Parker and A. Wirth*
450 The ability to compensate for suboptimal capacity decisions by optimal pricing decisions
*B. Skiera and M. Spann*
464 Hierarchical design of an integrated production and 2-echelon distribution system
*G. Barbarosoğlu and D. Özgür*
485 A route-neighborhood-based metaheuristic for vehicle routing problem with time windows
*F.-H.F. Liu and S.-Y. Shen*
505 A distributed genetic algorithm for deterministic and stochastic labor scheduling problems
*F.F. Easton and N. Mansour*
524 Two simulated annealing-based heuristics for the job shop scheduling problem
*K. Steinhöfel, A. Albrecht and C.K. Wong*
549 Searching for psychologically stable solutions of multiple criteria decision problems
*I. Kaliszewski and W. Michalowski*
563 Parameter estimation in stochastic scenario generation systems
*J.M. Mulvey, D.P. Rosenbaum and B. Shetty*
578 AHP-based evaluation of AHP-Software
*W. Ossadnik and O. Lange*
589 A new generic model for applying MAUT
*T. Bedford and R. Cooke*
605 Optimal stopping problem with finite-period reservation
*T. Saito*

620 On the feasible set for the squared Euclidean Weber problem and applications
*Z. Drezner and C.H. Scott*
631 Idempotent uninorms
*B. De Baets*
643 Contents Volume 118
